TALMORA DIAMOND COMPLETES \$289,459 NON-BROKERED PRIVATE PLACEMENT

(Toronto, November 12, 2009) Talmora Diamond Inc. (CNSX: TAI) is pleased to announce that it has completed a non-brokered private placement of 5,789,173 Units, comprised of 3,299,173 Hard Dollar Units and 2,490,000 Flow-Through Units, that were sold at \$0.05 per Unit, for gross proceeds of \$289,459 effective November 12, 2009. Each Unit consists of one common share and one-half of one common share purchase warrant. Each whole common share purchase warrant ("Warrant") entitles the holder to acquire one common share for \$0.16 until November 12, 2011. If during the term of the Warrants the common shares of Talmora trade at or above Can. \$0.25 for a period of 20 consecutive trading days, the Company may notify the warrant holder to exercise the Warrants at a date no later than 30 calendar days after this notification date or forfeit any unexercised Warrants at that time. All securities issued pursuant to the financing are subject to a four month hold period which expires on March 12, 2010. Insiders acquired a total of 1,700,000 Units in the financing. The Company paid finders fees of \$3,000. The proceeds of the financing will be applied to fund exploration and for working capital.

Talmora holds 13 contiguous prospecting permits (577,153 acres) and 175 mineral claims (54,800.8 acres) straddling the 68th parallel in the Horton River area south of Paulatuk in the Northwest Territories. Ten of the permits are in the Sahtu Settlement Region and three permits and all the claims in the Inuvialuit Settlement Region.

Previous sampling showed a strong correlation between kimberlite indicator minerals in till samples and magnetic anomalies with characteristics of kimberlite pipes. Financing exploration programs in 2008 was difficult, especially following the financial crisis and a drill program to test some of Talmora's targets was postponed.

A small exploration program in June/July 2009 focused on sampling, airborne magnetic surveying, and staking of 125 additional kimberlite targets in preparation for a major drill program when financing becomes easier.

The technical information contained in this release was compiled by Alan W. Davies, P.Eng., P.G., who is the Vice-President of Exploration for Talmora. Alan W. Davies is a qualified person as defined by National Instrument 43-101.
