The Company also engages in secondary activities, from time to time, involving the purchase or acquisition of certain industrial minerals – typically diatomaceous earth and bentonite – for distribution and re-sale or for use in an abandoned water well sealing operation.

Bird River Mines Inc.'s board of directors, officers and committee members are as follows; Douglas Reeson, Chairman, Nelson Shodine, President & CEO, Jon Bridgman, CFO, Ed Thompson, Secretary Treasurer. The Record Date for the meeting is November 10, 2009.

2. Activities of Management

The management continues to review its business strategy while monitoring the ongoing market and economic conditions. Management assesses new potential resource property opportunities as they are presented. The company's summer abandoned water well sealing service commenced operations in August. The late start was due to wet weather during the spring and summer and as a result sealing projects for the Manitoba Government were delayed. During the month of October the Company completed four wells for the Province of Manitoba. The Company's joint venture interest in the two oil well program with Antler River Resources are now in production. The wells are located near the towns of Sinclair and Pierson in south western Manitoba. Bird River Mines Inc. has a 5% gross interest (4% net) in the two wells.

17. Trends Impacting the Company

Mineral exploration is a speculative venture. There is no certainty that expenditure on exploration and development will result in the discovery of an economic ore body. At the present time, the Company does not hold any interest in a mining property in production. The Company's viability and potential success lie in its ability to develop, permit, exploit and generate revenue out of mineral deposits. Revenues, profitability and cash flow from any future mining operations involving the Company will be influenced by precious and/or base metal prices and by the relationship of such prices to production costs. Such prices have fluctuated widely and are affected by numerous factors beyond the Company's control.

The Company has limited financial resources and there is no assurance that additional funding will be available to it for further exploration and development of its projects or to fulfill its obligations under applicable agreements. There can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of the property interests of the Company with the possible dilution or loss of such interests.

BRMI is very dependent upon the personal efforts and commitment of its existing management who are not full-time employees of the Company. To the extent that management's services would be unavailable for any reason, the Company's operations could be disrupted. The Company may retain the services of outside consultants from time to time.
